

WHAT IS TYRFIL®?

TyrFil® is a patented polyurethane material that is pumped into off-the-road tires and cured into a flexible, durable filling that acts as a shock absorber and completely eliminates flat tires.

Unlike solid or aperture tires, TyrFil can be customized to work with any off-the-road tire, tread, or pressure.

TyrFil is most commonly used in industrial equipment for rental, military, construction, mining, earth moving and material handling applications.

WHY DO I NEED TYRFIL®?

Air-filled tires can be very costly.

Flat tires from rough terrain, and blowouts from heat and pressure, can cause expensive downtime, tip-overs, equipment damage, and injuries.

Solid tires, while flatproof, can cause driver injuries and vehicle wear in industrial workplaces.

The amplified G-forces* can cause stress damage to the equipment, and physical injury and exhaustion to the driver.

- ✓ **EXTEND TIRE LIFE**
- ✓ **ELIMINATE DOWNTIME**
- ✓ **INCREASE PRODUCTIVITY**

Equip your fleet with virtually indestructible tires that ride better and last longer.

- ✓ **No more flat tires, guaranteed**
- ✓ **No more downtime from punctures and blowouts**
- ✓ **Reduced tire repair and replacement costs**
- ✓ **Reduced driver fatigue and equipment damage due to Solid Shock**
- ✓ **Provides consistent tire deflection and footprint**

BENEFITS		PNEUMATIC	SOLID
Reduced shock & stress to equipment	X	X	
Available in multiple durometers, pressures, tread patterns	X	X	
Reduces operator fatigue	X	X	
Increase operator efficiency (decreased rolling resistance, better footprint)	X		
Recyclable	X		
Maintains proper PSI	X		X
Eliminates costly downtime	X		X
Heat resistance profile	X	X	
Rough terrain performance	X		

TyrFil's advanced patented formulations have made it cost-effective and universally trusted for over 40 years.

ELIMINATE
FLAT TIRES
FOREVER
GUARANTEED

*G-force is the measurement of acceleration felt as weight

Only the TyrFil Treatment gives you the smooth, safe ride that means less injury to your team, less wear on your equipment, and totally flatproof tires. TyrFil significantly enhances load deflection and footprint over solid tires, while dramatically decreasing the Solid Shock of G-force* when going over obstacles.
