

**GIVE US A CALL TODAY AND KEEP
YOUR EQUIPMENT ROLLING!**

Carefree Tire's innovative process of manufacturing is specifically designed to create a tire that has a durable non-porous outer elastomeric skin with a high-density cellular core consisting of trillions of trapped air cells.

The tough-yet-flexible outer skin allows for a firm tread area that provides excellent resistance to abrasion, cutting, punctures, and chemical attack, while the dense micro-cellular core reduces rolling resistance, and allows for greater shock absorption. As a result, not only will a Carefree Tire last four to ten times longer than a similar pneumatic tire, it requires much less effort to roll.

 **Carefree Tire**
Wheel & Tire Solutions

FOR OVER 50 YEARS,
Carefree Tire has been the
recognized leader in
lightweight solid tires.

Since 1971, the scientists at Carefree Tire have been developing a line of technologically advanced polyurethane products and in 1977 developed a high performance flexible polyurethane formulation. By combining this proprietary blend of micro-cellular polyurethane with a novel manufacturing method of centrifugal casting, the light-weight, durable Carefree Tire provides an “air cushioned” ride without adding any significant weight, delivering the assurance and durability of a solid tire with the performance of a pneumatic tire.

MEDICAL MOBILITY— FLAT FREE GUARANTEE

The medical industry depends on patients' mobility. Equipment is constantly on the move, and downtime from a flat is never acceptable. Ensuring your equipment is always ready when needed is simple with Carefree tires. From gurneys to wheelchairs and everything in between, we have the only Flat Free Guarantee in the business. Our tires have no air, so they'll never go flat and leave you waiting on a repair or replacement. Constructed of a durable non-porous outer elastomeric tread with a high-density cellular core consisting of trillions of trapped air cells, Carefree tires have the feel of a conventional air-filled tire with the added benefits of being resistant to punctures and abrasion. Plus, you will never waste time filling flat tires.

CAREFREE MAKES A TIRE FOR:

Manual Wheelchairs
Electric Wheelchairs
Sport & Recreational Wheelchairs
Hospital Equipment

Patient Mobility Equipment
Ambulance & Emergency Equipment
Operating Room Equipment
Hospital Services Equipment
